Contributions

Team members. Fill in the "Contribution" column with what each person actually did; it is deliberately left blank.

Member	Name	PRN	Contribution (fill in)
1	Saksham Singh Sisodiya	1262242908	*fill in*
2	Parth Dande	1262242629	*fill in*
3	Anupria Gupta	1262241349	*fill in*

Suggested module split

Each person should be able to explain their modules in the viva using `docs/WALKTHROUGH.md`.

Suggested owner	Files	Why it is a good unit
Core protocol (member 1)	`mpft/protocol.py`, `sender.py`, `receiver.py`, `cli.py`, `docs/PROTOCOL.md`, `docs/ARCHITECTURE.md`	The heart of the project
Emulator and experiments (member 2)	`mpft/emulator.py`, `experiments/`, `docs/TOPOLOGY.md`, `results/`	Self-contained, produces the graphs
Wireshark, dashboard and docs (member 3)	`wireshark/`, `web/`, `mpft/status.py`, `docs/screenshots/`, `docs/TEST_REPORT.md`	Visual, easy to demonstrate

This split is only a suggestion; change it to match what actually happened.

Git evidence

`git shortlog -sn` shows commits per author; each member should commit under their own identity (`git config user.name`, `git config user.email`).
